This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

It has been found on revision that there is reason to believe the enumeration on which the Table of Industries in St. John City and County, N.B., is based is imperfect; and a preliminary enquiry has confirmed the impression. This fact could not be known until the last figures were made; but it was not considered necessary nor advisable to postpone the issue of the volume on that account. A further investigation will be made, and the results published in the final report.

CENSUS OF 1880-81.

INTRODUCTION.

VOLUME THIRD.

Table XXI, being the first of this volume, relates to "Immovable Prope
Shipping" owned by the residents of each Census District.

As regards shipping, the Table represents the number and actual tonnage
by the residents of each District irrespective of where they may have bee
whether in foreign or Canadian ship yards, and irrespective of the Official Re
whether the same be registered in Canada or in foreign Offices.

As regards the immovable property, viz: Lands and the buildings there
same may be situated anywhere within Canada and not elsewhere, the
being residents of the Districts where enumerated and entered.

A little explanation may be necessary in respect of that part of Tabl
relating to the acreage and state of Lands occupied.—As a rule these la
situated within the sub-districts and districts named. The exceptions are
residents of cities and towns occupy and work lands situated outside the limits
and upon which no person resides. It also occasionally happens in villages
settled townships that a part of the holding extends beyond the limits of the
or of the township.

Tables XXIII-XXIV, it is only necessary to say that the animals and p
raised and produced on the lands occupied by residents of cities and towns
the limits thereof are entered as described in Table XXII.

RECENSEMENT DE 1880-81.

INTRODUCTION.

TROISIÈME VOLUME.

Le tableau XXI, premier de ce volume, rend compte de la propriété foncière et de la propriété maritime, possédées par les habitants de chaque district.

Pour ce qui a rapport à la marine, ce tableau donne le nombre de navires, et l'effectif du tonnage possédés par les habitants de chaque district, sans égard au lieu où ils ont été construits, que ce soit dans des chantiers étrangers ou canadiens, sans égard non plus au lieu de leur enregistrement officiel, que ce soit à des bureaux canadiens ou étrangers.

Pour ce qui regarde la propriété foncière (savoir, terres et constructions y érigées), ce tableau comprend toute telle propriété située à quelqu'endroit que ce soit dans les limites du Canada, et non ailleurs. Les propriétaires, résidents dans les districts où se trouvent situées telles propriétés, ont été énumérés et entrés.

Il peut être nécessaire de donner quelqu'explication concernant cette partie du tableau XXII, qui a rapport à la division par acres et à la condition des terres occupées, relativement à leur occupation. En général, les terres sont situées dans les limites des sous-districts et des districts dénommés. Il y a exception lorsque les habitants des villes et des villages occupent et exploitent des terres situées en dehors des limites de telles localités, et sur lesquelles personne ne réside. Il arrive souvent aussi, dans les anciens villages et les cantons établis depuis longtemps, qu'une partie des terres occupées s'étende au-delà des limites du village ou du canton.

Le tableau XXIII-XXIV, tout ce qu'il y a à dire, sur ce tableau c'est que les acres et le produit des terres occupées par des personnes résidant dans les villes et villages, et qui se trouvent situés en dehors des limites de telles localités, sont suivants les explications données au tableau XXII.

With regard to that part of Table XXV relating to the value of Furs, it is v to note that in some cases the fur-bearing animals were not entered in the distr in which they were taken, but in those where the hunters were found at time of enumeration, it being impracticable, in such cases, to determine with pr sion the whereabouts of their operations.

Table XXVI, Products of the Forest. In this and all other Tables relatin products of any kind the whole quantities are included whether intended or used home consumption, for export, or to be held in reserve for future use, being in the totals of the production for the twelve months between the 4th April 1880, the 4th April 1881.

The existing diversities in the mode of measuring saw logs between one par the country and another, has necessitated the adoption of a uniform census stand measure; that used consists in counting as one log that quantity of wood capable producing 100 square feet of lumber, board measure, or in other words 100 feet su ficies of one inch thick.

As may be inferred by looking at some of the figures in this table, the desc tions of timber have in some cases been extended by the enumerators to other ki than those intended to form part of the returns. The absence of appropriate colu for such entries has led to the undue augmentation of the proper quantities. known that in some cases, Fencing Material, Telegraph Poles, &c., were ta under one or other of the headings.

In Table XXVII (Fisheries) the products are entered by Districts only, w they are of secondary importance, and by Districts and Sub-Districts in those part the country where the products are usually very large.

The barrel of Fish mentioned is equal, on the average, to two hundred pou weight. It may be as well to mention here, that in the numerous cases in which fish are taken on the distant fishing grounds, the catch is entered in the sub-distr and districts in which the fishermen reside.

The quintal is the hundredweight quintal.

INDUSTRIES.

Tables XXIX to LIV are made, generally, to include all establishments of im tance where raw material is converted into a manufactured product for sale.

They do not include such products as are made at home for family use, as w len and linen cloth. The magnitude of those industries will appear on reference Table XXV, where 2,055,353 yards of linen are recorded, and 7,040,259 of woo cloth, neither do these tables include such articles of domestic manufacture made farmers and the sea-side population, as furniture, carriages, boats, boots and sh tools, implements, &c.

The industries have been arranged in five series and each classed in the t in alphabetical order in English and in both languages in the analytical table of c tents at the end of this volume.

Relativement à cette partie du tableau XXV qui a trait à la valeur des fourrures, il convient de noter que, dans quelques cas, les animaux à fourrures n'ont pas été entrés dans les districts où ils ont été capturés, mais bien à l'endroit où le chasseur a été rencontré, lors de l'énumération, vu l'impossibilité, en tels cas, d'indiquer avec précision le lieu de ses opérations.

Dans le tableau XXVI (Produits des forêts) de même que dans tous les tableaux qui ont rapport aux productions de toutes sortes, sont exprimés l'ensemble et la totalité des produits, qu'ils soient destinés ou employés à la consommation domestique, à l'exportation, ou bien tenus en réserve, étant de fait la production totale des douze mois écoulés depuis le 4 avril 1880 au 4 avril 1881.

La différence qui existe dans le mode de mesurer les billots de sciage dans les différentes parties du pays, a nécessité l'adoption d'un étalon uniforme de mesurage pour le recensement, qui consiste à compter comme un billot, ce qui produirait 100 pieds carrés de bois de sciage, en mesure de planche, en d'autres termes, 100 pieds de bois en superficie de bois scié sur un pouce d'épaisseur.

Comme peuvent le faire voir les chiffres de ce tableau, l'énumérateur a ajouté, dans quelques cas, d'autres espèces de bois de service à celles décrites comme devant faire le sujet des rapports. Il n'y avait pas de colonnes appropriées à telles entrées, ce qui a produit une augmentation inexacte pour les localités concernées, dans les quantités des produits tels qu'indiquées.

Il est évident qu'en certains cas, les matériaux pour clôtures, les poteaux de télégraphes, etc., ont été entrés sous l'un ou l'autre des en-têtes.

Dans le tableau XXVII (Pêcheries) les produits sont donnés par districts seulement, dans les endroits où ils sont d'une importance secondaire, et par districts et sous-districts, pour les parties du pays où ces produits sont ordinairement très considérables. Le baril de poisson mentionné dans les retours est égal, en moyenne, à 200 livres de poids. Il peut être utile de mentionner ici que lorsque le poisson est pris dans des endroits de pêche éloignés, ce qui est très fréquent, les produits de la pêche sont entrés dans les sous-districts ou dans les districts où résident les pêcheurs.

Le quintal est le quintal de 100 livres de poids.

LES INDUSTRIES.

Les tableaux XXIX à LIV comprennent généralement toutes les industries de quelque importance, dans lesquelles la matière première est transformée, pour le commerce, en produits manufacturés.

Ils ne comprennent pas les produits de la confection domestique, tels que les tissus de laine et de lin. L'importance de ces industries apparaît au tableau XXV, dans lequel sont entrées 2,055,353 verges de tissus de lin, et 7,040,259 verges de tissus de laine. Ces tableaux ne comprennent pas non plus les produits de confction domestique par les cultivateurs et les populations de la côte, tels que meublerie, carrosserie, chalouperie, chaussures, outillage, ustensiles, etc.

Les établissements industriels ont été partagés en cinq séries, et classés par ordre abétique du texte anglais, dans chaque série, et dans les deux langues, dans la nalytique des matières, à la fin de ce volume.

The first series is made to include all the districts, simply because one or more o the establishments enumerated are found therein. The second to the fifth are mad to include only those districts in which the industries enumerated are followed. Thi arrangement has no other importance than that of convenience in the distributio economy of space and facility of reference to each series, from Table LV which is recapitulation of all the industries, by Provinces.

The division of labor is not so minute here as in older and more populous com munities, and so we find establishments grouped together as "Carding and Shingl Mill." "Grist and Carding Mills," &c. It was found impossible to separate one fro the other, but they have been presented under the heading to which the partie appear to attach the greatest importance.

It may be remarked that in many establishments the workmen are not regularl employed, nor during the whole year. Some Saw Mills, especially in the Lowe Provinces, are owned and run by farmers, and may work but a week or more in th year, and but few any where, run more than six months, and so in other industries It thus arises that the amount of annual wages paid does not always give a fair indi cation of the rate of pay per day.

Table LV is a recapitulation of capital invested, hands employed, yearly wages value of raw material and total value of products of all industries presented in eac district.

Table LVI is a recapitulation of capital invested, number of hands employed, an value of products for each industry, for each Province and the Territories, and for th whole combined.

It may be well to mention that in numerous cases where custom work is take in and the raw material furnished by the customer, such as Carding Mills, Grist Mill Tailors' Work, Dress making, &c., much difficulty was experienced in obtaining th value of the raw material worked up. Although many of these establishments ar small, the aggregate value of the raw material used and the products would hav been considerably augmented, had the information been more readily obtainabl Where sufficient data existed, estimates were made. It should also be stated that i a few cases owners of large establishments refused to supply the informatio asked for.

In such cases the establishments are recorded as so many units with the other but without the details.

The two Indexes at the end of this volume, one in numeral and the other i alphabetical order may be used in connection with the Index of Sub-Districts in th first volume.

There is also an alphabetical Table of Contents in which each subject indicated.

La première série comprend les établissements qui se rencontrent dans tous les districts, par la seule raison qu'on les y trouvait énumérés. La seconde série jusqu'à la cinquième comprennent seulement les districts dans lesquels les industries se trouvent énumérées. Cette division par série n'a pas d'autre importance que celle de la commodité dans la distribution de l'espace, et de la facilité de référer à chaque série, en consultant le tableau LV, qui renferme la récapitulation de toutes les industries par province.

La division du travail n'est pas aussi minutieuse ici qu'elle l'est dans les sociétés plus anciennes et plus populeuses, et c'est ainsi que l'on trouve groupées ensemble différentes industries sous le nom de "Moulin à carder et à bardeaux," "Moulin à farine et à carder." Il a été impossible de les séparer, mais elles ont été présentées sous le titre de celle des industries qui paraissait la plus importante.

Il faut observer que dans beaucoup d'établissements, les personnes qui y sont employées ne le sont pas régulièrement, non plus que durant toute l'année. Bon nombre de moulins à scie, spécialement dans les provinces maritimes, sont la propriété de cultivateurs qui en font eux-mêmes l'exploitation, et ne les font fonctionner que quelques semaines durant l'année. Il y en a peu, en tout endroit, qui fonctionnent plus de six mois dans l'année, et il en est ainsi pour d'autres industries. Il en résulte donc que le montant des gages payées annuellement ne représente pas toujours exactement le prix de la journée ouvrière.

Le tableau LV offre une récapitulation du capital engagé, du nombre de bras employés, le montant des salaires annuels, la valeur des matières premières, et les valeurs totales des produits de toutes les industries pour chaque district de recensement.

Le tableau LVI contient la récapitulation du capital engagé, du nombre de bras employés, de la valeur des produits de chaque industrie pour chaque province, pour les Territoires, et pour l'ensemble de toute la Confédération.

Il est utile de mentionner que dans bien des cas où l'ouvrage fait à ordre est entré, la matière première étant fournie par la pratique, tel que pour les moulins à carder, les moulins à farine, les ouvrages de tailleurs, de modistes, etc., il a été très difficile d'obtenir la valeur de la matière première fournie. Quoique plusieurs de ces établissements soient peu considérables, la valeur totale de la matière première, ainsi que le montant des produits de ces établissements paraîtraient beaucoup plus considérables, si les informations suffisantes eussent été obtenues d'une manière plus parfaite. On en a fait des estimations, lorsqu'il s'est trouvé des données suffisantes. Il faut aussi remarquer que dans quelques cas, les propriétaires de grands établissements ont refusé de procurer les informations demandées.

Dans ces cas-là, les établissements ont été entrés comme autant d'unités, avec les autres, mais sans aucuns détails.

Les deux index qui se trouvent à la fin de ce volume, l'un par ordre de numéros, et l'autre par ordre alphabétique, se rapportent à l'index des sous-districts placé à la fin du premier volume.

Il y a aussi une table alphabétique des matières dans laquelle tous les sujets sont indiqués séparément.
